3. RISK DISCLOSURE

Trading on the financial market is connected with risk. This warning is informative in nature and does not indicate that all the mentioned risks can occur directly on you. The main purpose is to inform the client on all trading and non-trading risks, which may take place while working on the financial market with the Product Supplier. First of all, identify the purpose of your deposit and never deposit sum, losing of which will cause a negative impact on your budget. Trading on the foreign exchange market is dangerous because of the possibility of uncontrolled loss.

4. LEVERAGE

The effect of leverage allows you to trade larger amounts of money than deposit. However, leverage can either work on your side or against you. Leverage used by you for trading can significantly affect your trading account even if there is only a slight fluctuation in the rates for financial instruments traded. Carefully analyze and choose the size of the leverage that will help you avoid a high level of risk. You are aware of and shall fully assume all risks related to the leverage effect.
